ABOUT ME

Full-Stack Developer and Software Engineering student with experience building scalable web and mobile applications. Proficient in JavaScript/TypeScript ecosystems (React, Next.js, Node.js, Nest.js), Python (FastAPI) for backend development, and mobile development using Flutter. Proven track record of adapting quickly to diverse environments, spanning on-site internships and collaborative remote teams. Focused on writing clean, maintainable code that solves complex technical challenges and delivers business value.

EXPERIENCE

Ethioden IT Consultancy PLC | March 2026 - July 2026

Full Stack Developer Intern

- Developed **EstateLink**, a web-based real estate listing and rental management platform using React, FastAPI, and PostgreSQL, covering owner verification, listing approval, property search, and messaging workflows.
- Built secure REST APIs and real-time WebSocket messaging, implementing JWT/bcrypt authentication, role-based access control, and Chapa payment integration for owner subscriptions.
- Designed the database with SQLAlchemy and tested the system using pytest, Jest, and Postman, achieving 150/150 test cases passed, 23/23 functional requirements met, and 92% user satisfaction from 17 UAT users.

Kukunet PLC | June 2025 - September 2025

Remote Software Developer

- Built a web-based Agri Smart Advisor System providing farmers with region-specific crop recommendations, pest control guidance, and seasonal agricultural insights.
- Developed responsive frontend interfaces using React.js and Vite, and implemented backend APIs using FastAPI to support core application workflows.
- Collaborated remotely with the development team using Git for version control, code reviews, and collaborative development.

SKILLS

Languages & Frameworks: JavaScript, TypeScript, Go, Python, React, Next.js, Node.js, Express.js, NestJS, FastAPI, Gin, Flutter

Databases & Cloud Storage: PostgreSQL, MongoDB, Firestore, Cloudinary

Tools & DevOps: Docker, Git, GitHub Actions, AWS (EC2, S3)

Architecture & Practices: RESTful APIs, GraphQL, WebSockets, JWT, Agile/Scrum, Bloc State Management

UI/UX & Design: UI/UX Design, Graphic Design, Logo Design, Branding, Figma, Adobe Photoshop, Adobe Illustrator

EDUCATION

BSc in Software Engineering

Bahir Dar University | September 2023 - Present

PROJECTS

- **BDU FindBack - Lost & Found App |** Flutter, FastAPI, PostgreSQL
  A full-stack mobile application developed for Bahir Dar University to help students and staff report, search, and recover lost and found items. The app features a clean Flutter UI, secure user authentication, real-time notifications, and item management. FastAPI powers the backend REST APIs, while PostgreSQL manages users, item records, reports, and recovery workflows — providing an organized and efficient lost-and-found experience for the university community.
- **StudentSpend |** Flutter, Firebase
  A full-stack mobile application built with Flutter to help university students efficiently track, manage, and analyze their daily expenses. The app features a clean and intuitive UI, secure authentication, expense categorization, budget management, spending analytics, and real-time cloud synchronization. Firebase provides authentication, Cloud Firestore for expense data, and cloud-based services, while Flutter delivers a responsive cross-platform mobile experience — helping students build better financial habits and make informed spending decisions.
- **KidCode |** React, Vite, FastAPI, PostgreSQL
  An interactive online coding quiz platform designed for children to learn and test their knowledge of HTML, Scratch, and Python. The platform provides fun coding quizzes, automated scoring and results, progress tracking, and certificate generation, with React and Vite powering the frontend and FastAPI handling backend APIs and application logic.
